Cotiviti to Perform Focused and Limited Hospital Bill Validation Services

Blue Cross and Blue Shield of Minnesota and Blue Plus (Blue Cross) has engaged Cotiviti to perform focused and limited Hospital Bill Validation Services (HBV).

HBV reviews are site of service focused reviews where RN's verify the accuracy of the site of service billed for specific claims. Cotiviti currently conducts audit services of DRG claims for coding accuracy on behalf of the plan. Cotiviti will be requesting medical records from providers to perform the HBV reviews.

Identified HBV claims have a high potential for overpayment based on the level of care acuity and documented clinical information. HBV services are focused on short day lengths of stay of zero to one day (0,1) maximum.

HBV reviews use InterQual[®] as the screening criteria set identified by Blue Cross as the evidenced-based criteria utilized by the Provider and Plan.

HBV reviews are anticipated to commence during the month of April 2019.
