MHCP Pharmacy Benefit Update – New Drug-Related Prior Authorization (PA) with Quantity Limit (QL) Criteria: Hemophilia Factor IX PA with QL

Effective **January 1, 2021** Blue Cross and Blue Shield of Minnesota and Blue Plus (Blue Cross) will require **PA with QL** for **Hemophilia Factor IX products** under the pharmacy benefit plan.

The intent of the **Hemophilia Factor IX PA with QL** program is to promote appropriate selection of patients for treatment according to product labeling and/or clinical guidelines and/or clinical studies.

As stewards of healthcare expenditures for our subscribers, we are charged with ensuring they receive appropriate, quality care while also managing overall costs. The prior authorization process ensures that the health service or drug being proposed is medically necessary, and reflective of evidence-based medicine and industry standards, prior to treatment. This process helps us manage the cost and quality of care appropriately for our members.
