### Pharmacy Benefit Update – New Drug-Related Prior Authorization (PA) with Quantity Limit (QL) Criteria: Interleukin 5 (IL-5) Inhibitors

Effective July 1, 2019, Blue Cross and Blue Shield of Minnesota and Blue Plus (Blue Cross) will require PA with QL for Nucala®, self-administered injection, under the pharmacy benefit plan.

The intent of the IL-5 Inhibitors PA with QL program is to promote appropriately selected patients for treatment according to product labeling and/or clinical guidelines and/or clinical studies.

As stewards of healthcare expenditures for our subscribers, we are charged with ensuring they receive appropriate, quality care while also managing overall costs. The PA process ensures that the health service or drug being proposed is medically necessary, and reflective of evidence-based medicine and industry standards, prior to treatment. This process helps us manage the cost and quality of care appropriately for our members.

Nucala®(mepolizumab)	Self-Administered Injection has not launched and therefore the QL has not yet been established.
