Update: Medtronic Continuous Glucose Monitoring Device and Insulin Pump Systems Now Available Through the Pharmacy Benefit

*The information in this Provider Quick Point updates QP115-20. Pharmacy access is specific to **commercial** members who have Prime Therapeutics as their pharmacy benefits manager.*

In order to improve access to advanced insulin pump systems that improve outcomes for patients with type 1 diabetes, Blue Cross and Blue Shield of Minnesota and Blue Plus (Blue Cross) has collaborated with Medtronic on an innovative solution for our members.

The new MiniMed™ 770G insulin pump system and the MiniMed™ 670G insulin pump system will now be made available through a member's pharmacy benefit, improving speed of delivery and potentially lowering costs for members.

Products Impacted:

Pharmacy access is specific to commercial members who have Prime Therapeutics as their pharmacy benefits manager.

Providers now have the ability to prescribe these products through the pharmacy, streamlining the process for patients to improve their health and lower their health care costs.
