## PROVIDER INFORMATION

February 5, 2015

### **Commercial Network Guide**

Blue Cross and Blue Shield of Minnesota (Blue Cross) is committed to providing affordable products for our subscribers. To aid providers in identifying networks, Blue Cross has developed a Commercial Network Guide. The guide starts with our broadest network offering (Aware), which includes a new product called “Blue Cross and Blue Shield, a Multi-State Plan” available only to the individual market through MNsure. This guide is intended to aid providers in directing subscribers to in-network hospitals and other facilities. Subscribers participating in a narrow network will incur reduced benefits and higher patient responsibility when using nonparticipating network providers. Please note that the Commercial Network Guide does not include a listing of all our networks.

Additional information on Blue Cross network participation is available in the “Find a Doctor” online tool on the Blue Cross website at [bluecrossmn.com](http://bluecrossmn.com). We encourage you to direct subscribers to the “Find a Doctor” online tool to ensure their providers are in-network.

The Commercial Network Guide is located in the Education Center of our website at [providers.bluecrossmn.com](http://providers.bluecrossmn.com).

Updates will be made to the guide as necessary. Additional Quick Points will not be sent to advise of updates. As always, for the most current information please view the Commercial Network Guide online through the provider portal at [providers.bluecrossmn.com](http://providers.bluecrossmn.com).
