## PROVIDER INFORMATION

October 1, 2014

### **New Group Value Network for Local and National Large Group Market**

Blue Cross and Blue Shield of Minnesota (Blue Cross) is committed to offering a broad range of options for our subscribers and clients. One of those options is the new Group Value Network. Effective January 1, 2015, this narrow, price-sensitive network will be available for products offered to the local and national Large Group Market.

The Group Value Network will give consumers access to a more affordable option in our network portfolio. We will continue to offer our other network options such as Aware<sup>®</sup> and the Blue Performance<sup>SM</sup> tiered networks.

This is a state-wide network with better access in some parts of the state than others. Some of the providers in network are:

- Affiliated Community Medical Center
- Allina Health
- Altru Health System
- CentraCare
- Children's Hospitals and Clinics
- Entira Family Clinics
- Gundersen Health System
- Hennepin County Medical Center
- Mankato Clinic
- Olmsted Medical Center
- Ridgeview Medical Center
- Sanford Health
- St Luke's Health Care System
- Winona Health

Please note that in addition to the providers listed above many of the independent hospitals and clinics throughout Minnesota are also part of this new network.

Beginning October 1, 2014, additional information on this network and our other new networks will be available in the Find a Doctor tool on the Blue Cross website at [bluecrossmn.com](http://bluecrossmn.com). We encourage you to direct subscribers to Blue Cross to ensure their providers are in network.
