Quality Improvement Project for SecureBlueSM (HMO SNP) and Blue Essentials (HMO-POS) subscribers

Blue Cross and Blue Shield of Minnesota and Blue Plus (Blue Cross) is committed to ensuring our SecureBlue and Blue Essentials subscribers with diabetes and/or cardiovascular disease have access to quality care. In accordance with evidence-based clinical practice guidelines, we are reaching out to targeted subscribers with cardiovascular disease who do not appear to have received an annual LDL cholesterol, and diabetic subscribers who do not appear to have had an annual LDL cholesterol and/or Hemoglobin A1C this year.

We are asking Care Coordinators at Blue Cross and our delegated county agencies to contact eligible subscribers to assist them in getting these recommended monitoring labs. As a result, our subscribers may present to your clinic requesting their annual LDL or A1C testing. As always, thank you for providing excellent medical care to our subscribers.

Questions?

If you have questions, please contact Dr. Andrea Hillerud, Medical Director – Quality Health Outcomes and Informatics at **(651) 662-1176**.
