Cost share adjustments for 2012 Medicaid claims

On January 31, 2013, Blue Plus began an effort to correct the cost share amounts on a small portion of Medicaid claims for services incurred in 2012. The purpose of this adjustment is to correct any Medicaid claims where a subscriber's cost share was incorrectly over applied. In most cases, providers will see an increase in payment due to the correction as the copay amount will be removed. Please note that if additional reimbursement is received due to reduced cost share amounts, providers are required to promptly return the corresponding overage to the subscriber to reimburse them for any subscriber liability amounts they may have already paid.
