Minnesota licensed professional counselors and licensed professional clinical counselors

Currently, Blue Cross and Blue Shield of Minnesota and Blue Plus credential Minnesota licensed professional counselors (LPC) and licensed professional clinical counselors (LPCC). They may submit claims using an individual provider number or their NPI as long as they are practicing as part of a Rule 29 licensed clinic, a community mental health center or a behavioral health clinic per the Blue Cross criteria.

This is a reminder to these clinic types that LPCs and LPCCs are **ineligible** providers for Minnesota Health Care Programs enrollees.
