### **SecureBlue (MSHO) Members Post Cataract Eyewear Benefit for Implants with Intraocular Lens**

Medicare Part B allows one pair of frames per cataract, post-surgery, for implants with intraocular lens.

SecureBlue is a Blue Plus Special Needs Plan (SNP), for members with Minnesota Senior Health Options (MSHO), which is a fully integrated Medicare and Medicaid product for members age 65 and over. If charges for frames (per cataract, post-surgery, for implants with intraocular lens) are submitted with the Medicaid rate, it will create an underpayment. In order for the claim to price correctly, the frames for this service must be submitted with the Medicare rate.
