

Legacy to Current Report Name Crosswalk

Updated: 2/15/2022

In many cases, there are a variety of new, pre-built reports available to replace a single, old report. This enables ease of reporting through a click-and-run process. Single reports can be bundled to automatically generate all data on a single export.

See full list of published bundles at the end of document.

For full report inventory samples, contact your Account Management team.
